

Productivity | Stain Management | Surface Protection | Surface Repair/Restoration

BIOCIDE SEALER ADDITIVE - \$32.99

This environmentally-friendly, miracle-in-a-bottle, when added to sealer, effectively prevents mold, mildew and algae growth on stone and grout.
(1.5 oz)

DIAMOND LUBRICANT - \$19.95

Extends the life of diamond pads. Cools diamonds and provides a less sticky surface so slurry doesn't clog the diamonds.
(4 oz)

GRANITE SUNSCREEN - \$29.95

This is a great solution to protect stone exposed to direct sunlight. Just like protecting your skin from UV damage, this product blocks UV radiation, inhibiting fading and surface deterioration of natural stone, especially those that have been reinforced with resins, and engineered stone.
(4 oz)

GRANITE TEST KIT - \$69.95

Concerned that your granite countertops might have been 'doctored' (dyed) to look like a higher quality stone? This is a common problem especially with dark granite such as black absolute. This test kit will tell you if the stone has been dyed to artificially darken it.
(2) 4 oz Reagents

INVISIBLE SQUEEGEE - \$29.95

Creates an invisible barrier on shower doors to inhibit soap film build-up, much like using a squeegee after everyone has showered for the day.
(4 oz)

STAIN SPONGE - \$12.95

Removing most common stains from natural stone surfaces and masonry has never been easier! Just wet the sponge with water, and place on the stained area. Easy for your customers to use!
(3) 4x6 in pouches

**POULTICE POWDER –
FOR RUST STAINS - \$16.95**

Our rust removal poultice contains a special blend of rust removers to remove the most stubborn rust stains on stone and masonry surfaces. Simply add water, mix and apply to stain.

**POULTICE POWDER –
NO CHEMICALS - \$12.95**

Non staining poultice powder to remove most stain from stone and masonry surfaces when mixed with our specials reagents.
(1 lb)

BLUE BE GONE - \$69.95

Hailed by stone fabricators around the world, this very effective solution removes that weird blue/green stain that often occurs when certain glues are used on granite surfaces.
(1) 4 oz bottle of Reagent A and (1) 4 oz bottle of Reagent B to be mixed together.

ULTIMATE STAIN REMOVAL REAGENT #1 - \$69.95

This reagent is to be used with a dry poultice material to create a poultice to remove ORGANIC stains from stone and other hard porous surfaces.
(16 oz)

ULTIMATE STAIN REMOVAL REAGENT #2 - \$79.95

Reagent #2 is a chemical reagent to add to a poultice material to break down and remove most INORGANIC stains on porous hard surfaces.
(16 oz)

ULTIMATE STAIN REMOVAL REAGENT #3 - \$69.95

Reagent #3 is to be used with a dry poultice material to create a poultice to remove METAL stains from stone and other hard porous surfaces.
(16 oz)

ULTIMATE STAIN REMOVAL KIT - \$69.95

As a restoration contractor, for years Fred would carry dozens of stain removal chemicals to remove all types of stains on stone, tile, and concrete. Ultimately, he noticed that the vast majority of stains he was dealing with were most successfully resolved using a blend of different chemicals and that only three of these mixtures were needed in almost all staining situations. Those 3 chemical blends, or reagents, and Fred's expertise presented in "Ultimate Guide to Professional Stain Management" are what make up the Ultimate Stain Removal system and products. (Ultimate Guide to Professional Stain Management and 4 oz sample sizes of the 3 chemical reagents needed for most stains.)
